

# 23

JAN. 2021

# AAEOY SPEAKER SERIES

# 1:30

PM. PST

**Presentation:** Improving Life –  
Science & Technology  
Will Lead Us out of the Pandemic

**Interview:** Flying High –  
A Journey from an Engineer  
to a Global Leader

Q & A

Science innovation through industry collaboration will lead us out of the pandemic by offering a safe, healthy, and efficient travel experience by minimizing air travel health risks. COVID-19 is treated like any threat to the safety of an airplane – by assessing the hazard, understanding the environment, and applying proven aerospace engineering practices and data to find solutions.
